Professional Summary

Full Stack Developer experienced in designing, developing, and deploying web applications across front-end and back-end technologies. Delivered high-quality solutions through strong analytical abilities and effective problem-solving techniques. Focused on leveraging a versatile skill set to contribute to diverse projects in a collaborative, fast-paced environment.

Skills

- | | |
|--|---|
| <ul style="list-style-type: none">Frontend Technologies: React.js, Next.js, HTML5, CSS3 | <ul style="list-style-type: none">Backend Technologies: Node.js, NestJS, FastAPI, REST API Development |
| <ul style="list-style-type: none">Programming Languages: Python, PHP, JavaScript, TypeScript, SQL | <ul style="list-style-type: none">Databases: MySQL, PostgreSQL |
| <ul style="list-style-type: none">Machine Learning & Data Science: Scikit-learn, TensorFlow, OpenCV, Pandas, NumPy | <ul style="list-style-type: none">Data Analysis & Visualization: Microsoft Excel, Power BI, Tableau |
| <ul style="list-style-type: none">Developer Tools & Platforms: Git, GitHub, Jupyter Notebook, Kaggle, Prisma, Supabase, Vercel | <ul style="list-style-type: none">Responsive web design |

Project Experience

Full-Stack Developer, 06/2026 to Current

Emergency Response Platform

- Architected a full-stack emergency response platform using React, FastAPI, Supabase (PostgreSQL), and TypeScript, enabling users to instantly request ambulances, firefighters, police assistance, and emergency medicine delivery through a unified interface.
- Engineered real-time emergency request workflows with intelligent service allocation, live status tracking, secure authentication, geolocation integration, and role-based dashboards to streamline coordination between users and emergency service providers.
- Developed scalable backend APIs and database architecture for emergency case management, ambulance categorization, prescription-based medicine requests, and digital payments,

ensuring high availability, secure data handling, and rapid response during critical situations.

Full-Stack Developer, 07/2025 to 04/2026

AI Driven Unified Investment Guidance Platform

- Developed unified AI platform for processing large-scale financial data — structured (market data) and unstructured (news sentiment, social media) — as core engine for multi-asset investment analysis.
- Built predictive ML models with LSTMs and NLP sentiment analysis to forecast market trends and assess cross-asset risks, enabling real-time signal generation.
- Applied portfolio optimization algorithms including Modern Portfolio Theory and Deep Reinforcement Learning to create automated, risk-adjusted investment strategy recommendations.

Front End Developer, 11/2025 to 12/2025

Personal Portfolio Website

- Built a production-ready personal portfolio using Next.js (App Router) with server-side rendering, modular component architecture, and a glassmorphism-inspired UI featuring consistent typography and spacing.
- Implemented fully responsive layouts for desktop, tablet, and mobile devices with scroll-based reveal animations and smooth section-based navigation for a polished browsing experience.
- Optimized static asset delivery and deployed the application on Vercel, adhering to frontend engineering best practices for performance, accessibility, and scalability.

Education

Bachelor of Engineering: Computer Engineering, 06/2026

M.H. Saboo Siddik College of Engineering - Mumbai, Maharashtra

- Courses: Full Stack Development, Website Development, Database Management, Deployment, Compilers, Software Engineering
- GPA: 7.04

CBSE: 06/2022

International Indian School Jeddah - Jeddah, KSA

- Percentage: 76.2%

Awards

- Secured Third Position at IIGC Hackathon - MHSSCE
